DETAILED ACTION

1. Applicant's arguments and amendments have been fully and carefully considered.

Applicant's amendments place the application in condition for allowance. Claims 11-13 were deemed allowable and remain so allowable. Regarding informal matters applicant's header to the response to this application indicates on the header of the claims and remark section, application No. 09/775,278 that is undoubtedly a typographical error. The remarks and amendments reflect the prosecution history for the Ramshaw et al. 09/913,905 application and construed as such by the examiner.

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach and/or suggest a RSORT or spinning disc reactor as claimed which includes a hollow support element rotatable about an axis having a first external reaction surface and a second internal heat transfer surface and means for applying a heat transfer fluid to the second surface the first and second surfaces being in thermal communication with each other and the support element including an internal space bounded on the side by the second surface, wherein a plate or member is provided inside the hollow support element, the plate or membrane extending substantially over the whole internal space to define a first space between the second surface and one side of the plate or membrane and a second space between an opposed side of the plate or membrane and internal surface of the support element remote from the second surface leaving a gap at the edge of the plate or membrane to permit heat transfer fluid to flow between the first and second spaces wherein the opposed side of the plate or membrane is provided with vanes, fins or other projections with a mesh or gauze or foam, these being configured to prevent formation of free vortices in the heat transfer fluid and further comprising a feed means for supplying at least one reactant in a fluid phase to the external reaction surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
